All is going well now.

I've switched to manually converging projectors after not being able to get any bays completed after 2 full nights of trying.

After just one night, I have 6 bays completed and looking very good.

Most projectors are up and running with signal right now.

I think we're just missing 1 – and it's only AV head room access that's slowing us down to fix that – which we should have today.

Player specs look great.

Cheers,

Justyn Roy

Subject: Okada - Checking in

Hi Justyn,

How is it going over in Manila? Are you able to get what you need done with the teams etc?
Let me know if there are any issues so I may work with Mike to eliminate them.

On another note, did you see the PB Player specs that I sent the team. For Lumieres?
Remus wanted your confirmation prior to accepting this player.

We would have this player and the Octo server from our office. Hexagon backed out of their deal to provide players for us so we are scrounging locally for the equipment required.

Let me know if this is sufficient.

Talk to you soon.

Best Regards

Anna
